AI Engineer · Mobile & Full Stack · US Navy Veteran

SUMMARY

AI, mobile, and senior full stack engineer with **9+ years** shipping production software to real users, from a year of LangChain/LangGraph agentic systems on Azure OpenAI and Pinecone, to consumer products people know: **NBA Top Shot**, the **HBO Max** streaming apps, and **Hulu's** video pipeline. I build AI agents, mobile apps, and the interfaces people actually use, across FastAPI backends, React/TypeScript web, and React Native iOS.

EXPERIENCE

VeteranAI

Mar 2025 to May 2026 · Remote

Senior Full Stack Engineer

- ♦ **Agentic claims assistant.** Shipped LangChain/LangGraph workflows on Azure OpenAI and Pinecone hybrid retrieval, 18+ tools over medical literature, the M-21 manual, and 38 CFR, drafting personal statements, buddy statements, and nexus letters. **~60% faster time to draft, for 40,000+ veterans.**
- ♦ **React Native iOS app, from zero.** Built the production RN 0.84 app from the ground up: Aurora Night, my own Liquid Glass design system (36 components across 18 screens), on device speech to text and text to speech for accessibility, and a Chat Artifacts layer surfacing disabilities, claims, and documents inline during a chat. Shipped to TestFlight and the App Store.
- ♦ **React web app, from zero → 20 modules.** Sole frontend engineer: architecture, tooling, component library, routing, Supabase auth, and Stripe, zero to live on Vercel; then migrated to a vertical slice architecture of 20 domain modules, cutting coupling across domains ~40%.
- ♦ **VA.gov dual OAuth integration.** Two OAuth flows (benefit claims + veteran verification) with distinct scopes and token lifetimes, async ratings and service history polling, and full Form 21-0966 + 21-526EZ submission paths.
- ♦ **Referral & acquisition engine.** End to end referral system across web and mobile: code generation, attribution, a reward engine keyed to milestones (badge/monthly/annual Pro tiers), reward distribution on Celery, and a share command center. A measurable organic growth channel with zero paid spend.
- ♦ **Backend, jobs & notifications.** FastAPI backend with Celery + Redis workers across dedicated queues (symptom reminders, document ingestion, webhook fan out, scheduled VA syncs), an FCM push system (device token registry, per user preferences) with Flower observability, on AWS ECS Fargate/S3/Textextract/CloudWatch, GitHub Actions CI/CD.
- ♦ **Production monetization.** Stripe Checkout (web) + RevenueCat StoreKit 2 IAP (iOS) with idempotent webhook reconciliation. Apple 3.1.1/3.1.2 compliant, subscription drift cut to near zero.
- ♦ **Onboarding & support.** Built full onboarding (guided walkthrough, in app tutorial, plain language guide); the engineer users reached directly (live video calls, community); owned the veteranai.co marketing site from Figma handoffs; authored technical docs for web and mobile.

StaffWerk

Apr 2024 to Jan 2025 · Oceanside, CA (onsite)

Staff Software Engineer · React Native / Expo

Took a full technical handover from an outside agency (audited the React Native/Expo codebase; stood up in house CI/CD, Git branching, and ticketing); ran four weekly **live operational events with 1,000+ concurrent users**: live worker location monitoring, automated hour logging, same session payment disbursement; biweekly App Store + Google Play releases via Expo. Led roadmapping, sprint planning, and companywide training.

Vision Media

Nov 2022 to Apr 2023 · Carlsbad, CA (remote)

Full Stack Engineer · React / Ionic / Vue

Built **Screeners**, a private prerelease screening app (mobile + web) where studios show unreleased films and shows to reviewers and a film's own cast, with a **DRM watermark** that overlays the logged in viewer's name the instant a screenshot or recording is taken. React/Ionic/Vue/CoffeeScript/PHP/MySQL; mobile on Ionic, CapacitorJS, Node, Docker, BitMovin.

Carvana

Jan 2021 to Nov 2022 · Remote

Lead Senior Software Engineer · React / TS / C#

Primarily built **UI components and API contracts** for a delivery dashboard and online applications in React, TypeScript, and C#; RESTful services over dynamic datasets (Redux, GraphQL); contributed to the internal UI component library; reviewed code for security and cross browser compatibility; led and taught code sessions. **Engineer of the Quarter.**

TEKsystems

2018 to 2021 · contract

Full Stack / UI Engineer

Scaffolded the **HBO Max** streaming UI across Apple TV, Roku, and web with full ownership of the movie section; helped build **Hulu's** ETL video pipeline: ingest, transform, and delivery at streaming scale. Ran alongside my Blizzard and Dapper Collectives contracts.

Dapper Collectives

2018 to 2021 · contract · Los Angeles, CA

Software Engineer → Senior Developer

Contributed to **NBA Top Shot** and helped build the **Flow Playground** (the in browser Cadence editor for the Flow blockchain); built web3 auth and voting tools, custom APIs for whitelisting/waitlisting/auth, a FLOW DAO token maker, FCL React hooks, and blockchain/social sign in (Flow, Blocto).
React/Svelte/Cadence/GO/Flask/MongoDB/Kubernetes/AWS.

Blizzard Entertainment

May 2018 to Jan 2020 · contract

Full Stack Engineer

Built the **BlizzCon** website and its age verification component, plus content tooling so teams could ship landing pages without writing code. Python/React/C++.

Harris Media

May 2016 to May 2018

Full Stack Engineer · React / Liquid / PHP

Built website themes from scratch in React/JavaScript/Liquid/PHP/Ionic; maintained 3 CMS/CRM platforms across the oil, finance, and politics sectors.

STACK

AI LangChain, LangGraph, Pinecone, Azure OpenAI · **Backend** Python, FastAPI, Django, Celery, Redis, PostgreSQL, MySQL, SQLAlchemy · **Web** TypeScript, React 18, Redux Toolkit / RTK Query, Vite, Vitest, Cypress, Vercel · **Mobile** React Native 0.84, Reanimated v4, Expo, StoreKit 2 · **Cloud** AWS (ECS Fargate, S3, Textract, CloudWatch), Kubernetes, Docker, GitHub Actions, Sentry, Supabase, Firebase · **Payments** Stripe, RevenueCat

EDUCATION & SERVICE

University of Texas at Austin, Computer Science certification (2016). **US Navy veteran** (2013 to 2016). 10th Planet Jiu Jitsu amateur MMA · ATA Taekwondo brown belt · USA Cycling. Engineer of the Quarter, Carvana.
